

Helicobacter pylori Antibody - With BSA and Azide

Mouse Monoclonal Antibody [Clone HP/212]

Catalog # AH12967

Product Information

Application	IF, FC, E
Host	Mouse
Clonality	Monoclonal
Isotype	Mouse / IgG1, kappa
Clone Names	HP/212
Calculated MW	Not Known

Additional Information

Application Note	IF~~1:50~200 FC~~1:10~50 E~~N/A
Storage	Store at 2 to 8°C.Antibody is stable for 24 months.
Precautions	Helicobacter pylori Antibody - With BSA and Azide is for research use only and not for use in diagnostic or therapeutic procedures.

Background

The spiral shaped bacterium *Helicobacter pylori* is strongly associated with inflammation of the stomach and is also implicated in the development of gastric malignancy. *H. pylori* is known to cause peptic ulcers and chronic gastritis in human. It is associated with duodenal ulcers and may be involved in development of adenocarcinoma and low-grade lymphoma of mucosa associated lymphoid tissue in the stomach. This antibody stains the individual *H. pylori* bacterium when it presents on the surface of the epithelium or in the cytoplasm of the epithelial cells in biopsy tissue sections from the antrum and body of the stomach.
