

# CLDN18 antibody

Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP22438a

#### **Product Information**

**Application** WB, E **Primary Accession** P56856 Reactivity Human Host Rabbit Clonality polyclonal Isotype Rabbit Ig **Clone Names** R03395 **Calculated MW** 27856

### **Additional Information**

**Gene ID** 51208

Other Names Claudin-18, CLDN18

**Target/Specificity**This antibody is generated from a rabbit immunized with a KLH conjugated

synthetic peptide between amino acids from human.

**Dilution** WB~~1:1000 E~~Use at an assay dependent concentration.

**Format** Purified polyclonal antibody supplied in PBS with 0.05% (V/V) Proclin 300. This

antibody is prepared by Saturated Ammonium Sulfate (SAS) precipitation

followed by dialysis against PBS.

**Storage** Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store

at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions** CLDN18 antibody is for research use only and not for use in diagnostic or

therapeutic procedures.

#### **Protein Information**

Name CLDN18

**Function** Involved in alveolar fluid homeostasis via regulation of alveolar epithelial

tight junction composition and therefore ion transport and solute

permeability, potentially via downstream regulation of the actin cytoskeleton organization and beta-2-adrenergic signaling (By similarity). Required for lung alveolarization and maintenance of the paracellular alveolar epithelial barrier (By similarity). Acts to maintain epithelial progenitor cell proliferation and organ size, via regulation of YAP1 localization away from the nucleus and

thereby restriction of YAP1 target gene transcription (By similarity). Acts as a negative regulator of RANKL-induced osteoclast differentiation, potentially via relocation of TJP2/ZO-2 away from the nucleus, subsequently involved in bone resorption in response to calcium deficiency (By similarity). Mediates the osteoprotective effects of estrogen, potentially via acting downstream of estrogen signaling independently of RANKL signaling pathways (By similarity).

**Cellular Location** Cell junction, tight junction {ECO:0000250 | UniProtKB:P56857}. Cell

membrane {ECO:0000250 | UniProtKB:P56857}; Multi-pass membrane protein.

Note=Localizes to tight junctions in epithelial cells

{ECO:0000250|UniProtKB:P56857} [Isoform A2]: Cell junction, tight junction

{ECO:0000250|UniProtKB:P56857}. Lateral cell membrane

{ECO:0000250 | UniProtKB:P56857}

**Tissue Location** [Isoform A1]: Expression is restricted to the lung.

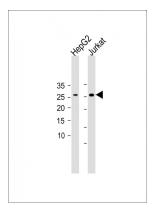

## **Background**

Involved in alveolar fluid homeostasis via regulation of alveolar epithelial tight junction composition and therefore ion transport and solute permeability, potentially via downstream regulation of the actin cytoskeleton organization and beta-2-adrenergic signaling (By similarity). Required for lung alveolarization and maintenance of the paracellular alveolar epithelial barrier (By similarity). Acts to maintain epithelial progenitor cell proliferation and organ size, via regulation of YAP1 localization away from the nucleus and thereby restriction of YAP1 target gene transcription (By similarity). Acts as a negative regulator of RANKL-induced osteoclast differentiation, potentially via relocation of TJP2/ZO-2 away from the nucleus, subsequently involved in bone resorption in response to calcium deficiency (By similarity). Mediates the osteoprotective effects of estrogen, potentially via acting downstream of estrogen signaling independently of RANKL signaling pathways (By similarity).
