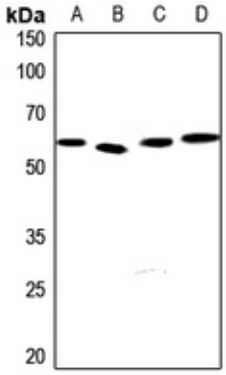
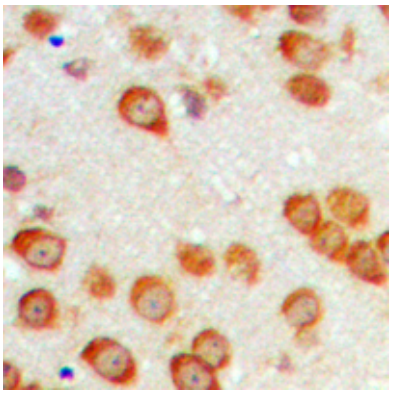
Images



Western blot analysis of EPN3 expression in HEK293T (A), H446 (B), mouse testis (C), rat testis (D) whole cell lysates.



Immunohistochemical analysis of EPN3 staining in human brain formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.
