

Anti-Plasminogen HC A Antibody

Rabbit polyclonal antibody to Plasminogen HC A Catalog # AP61045

Product Information

ApplicationWBPrimary AccessionP00747Other AccessionP20918

Reactivity Human, Mouse, Rat

Host Rabbit
Clonality Polyclonal
Calculated MW 90569

Additional Information

Gene ID 5340

Other Names Plasminogen

Target/Specificity KLH-conjugated synthetic peptide encompassing a sequence within the

N-term region of human Plasminogen HC A. The exact sequence is

proprietary.

Dilution WB~~WB (1/500 - 1/1000)

Format Liquid in 0.42% Potassium phosphate, 0.87% Sodium chloride, pH 7.3, 30%

glycerol, and 0.09% (W/V) sodium azide.

Storage Store at -20 °C.Stable for 12 months from date of receipt

Protein Information

Name PLG

Function Plasmin dissolves the fibrin of blood clots and acts as a proteolytic factor in

a variety of other processes including embryonic development, tissue remodeling, tumor invasion, and inflammation. In ovulation, weakens the walls of the Graafian follicle. It activates the urokinase-type plasminogen activator, collagenases and several complement zymogens, such as C1, C4 and C5 (PubMed:6447255). Cleavage of fibronectin and laminin leads to cell detachment and apoptosis. Also cleaves fibrin, thrombospondin and von Willebrand factor. Its role in tissue remodeling and tumor invasion may be

modulated by CSPG4. Binds to cells.

Cellular Location Secreted. Note=Locates to the cell surface where it is proteolytically cleaved

to produce the active plasmin. Interaction with HRG tethers it to the cell

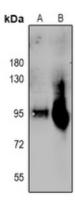

surface

Present in plasma and many other extracellular fluids. It is synthesized in the liver

Background

KLH-conjugated synthetic peptide encompassing a sequence within the N-term region of human Plasminogen HC A. The exact sequence is proprietary.

Images

Western blot analysis of Plasminogen HC A expression in PC12 (A), CT26 (B) whole cell lysates.
