Protein Information

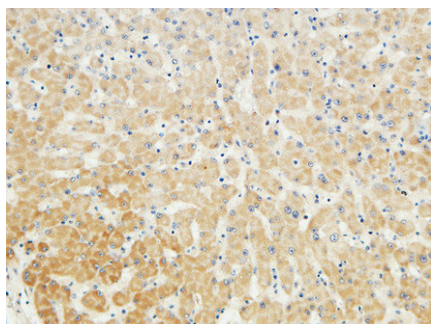

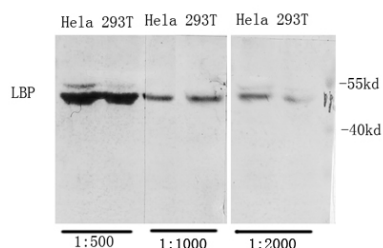

Name	LBP
Function	Plays a role in the innate immune response. Binds to the lipid A moiety of bacterial lipopolysaccharides (LPS), a glycolipid present in the outer membrane of all Gram-negative bacteria (PubMed: 24120359 , PubMed: 7517398). Acts as an affinity enhancer for CD14, facilitating its association with LPS. Promotes the release of cytokines in response to bacterial lipopolysaccharide (PubMed: 24120359 , PubMed: 7517398).
Cellular Location	Secreted. Cytoplasmic granule membrane {ECO:0000250 UniProtKB:P17213}. Note=Membrane- associated in polymorphonuclear Leukocytes (PMN) granules {ECO:0000250 UniProtKB:P17213}
Tissue Location	Detected in blood serum (at protein level).
