

TTN Polyclonal Antibody

Catalog # AP74183

Product Information

Application IHC-P **Primary Accession** 08WZ42

Reactivity Human, Mouse, Rat

Host Rabbit
Clonality Polyclonal
Calculated MW 3816030

Additional Information

Gene ID 7273

Other Names Titin (EC 2.7.11.1) (Connectin) (Rhabdomyosarcoma antigen MU-RMS-40.14)

Dilution IHC-P~~IHC-p 1:50-200, ELISA 1:10000-20000

Format Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.09% (W/V) sodium

azide.

Storage Conditions -20°C

Protein Information

Name TTN

Function Key component in the assembly and functioning of vertebrate striated

muscles. By providing connections at the level of individual microfilaments, it contributes to the fine balance of forces between the two halves of the sarcomere. The size and extensibility of the cross-links are the main determinants of sarcomere extensibility properties of muscle. In non-muscle

cells, seems to play a role in chromosome condensation and chromosome segregation during mitosis. Might link the lamina network to chromatin or

nuclear actin, or both during interphase.

Cellular Location Cytoplasm. Nucleus

Tissue Location Isoforms 3, 7 and 8 are expressed in cardiac muscle. Isoform 4 is expressed

in vertebrate skeletal muscle. Isoform 6 is expressed in skeletal muscle (at

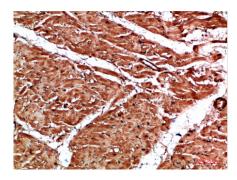

protein level)

Background

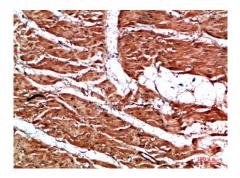

Key component in the assembly and functioning of vertebrate striated muscles. By providing connections

at the level of individual microfilaments, it contributes to the fine balance of forces between the two halves of the sarcomere. The size and extensibility of the cross-links are the main determinants of sarcomere extensibility properties of muscle. In non-muscle cells, seems to play a role in chromosome condensation and chromosome segregation during mitosis. Might link the lamina network to chromatin or nuclear actin, or both during interphase.
