## Protein Information

<b>Name</b>	BECN1
<b>Synonyms</b>	GT197
<b>Function</b>	Plays a central role in autophagy (PubMed: <a href="#">18570871</a> , PubMed: <a href="#">21358617</a> , PubMed: <a href="#">23184933</a> , PubMed: <a href="#">23974797</a> , PubMed: <a href="#">25484083</a> , PubMed: <a href="#">28445460</a> , PubMed: <a href="#">37776275</a> ). Acts as a core subunit of the PI3K complex that mediates formation of phosphatidylinositol 3-phosphate; different complex forms are believed to play a role in multiple membrane trafficking pathways: PI3KC3-C1 is involved in initiation of autophagosomes and PI3KC3-C2 in maturation of autophagosomes and endocytosis. Involved in regulation of degradative endocytic trafficking and required for the abscission step in cytokinesis, probably in the context of PI3KC3-C2 (PubMed: <a href="#">20208530</a> , PubMed: <a href="#">20643123</a> , PubMed: <a href="#">23974797</a> , PubMed: <a href="#">26783301</a> ). Essential for the formation of PI3KC3-C2 but not PI3KC3-C1 PI3K complex forms. Involved in endocytosis (PubMed: <a href="#">25275521</a> ). May play a role in antiviral host defense.
