

# OPA1 Rabbit mAb

Catalog # AP76972

## Product Information

---

|                          |                                               |
|--------------------------|-----------------------------------------------|
| <b>Application</b>       | WB, IHC-P, IF, FC, ICC                        |
| <b>Primary Accession</b> | <a href="#">O60313</a>                        |
| <b>Reactivity</b>        | Rat, Human, Mouse                             |
| <b>Host</b>              | Rabbit                                        |
| <b>Clonality</b>         | Monoclonal Antibody                           |
| <b>Isotype</b>           | IgG                                           |
| <b>Conjugate</b>         | Unconjugated                                  |
| <b>Immunogen</b>         | A synthesized peptide derived from human OPA1 |
| <b>Purification</b>      | Affinity Chromatography                       |
| <b>Calculated MW</b>     | 111631                                        |

## Additional Information

---

|                    |                                                                                                    |
|--------------------|----------------------------------------------------------------------------------------------------|
| <b>Gene ID</b>     | 4976                                                                                               |
| <b>Other Names</b> | OPA1                                                                                               |
| <b>Dilution</b>    | WB~~1/500-1/1000 IHC-P~~N/A IF~~1:50~200 FC~~1:10~50 ICC~~N/A                                      |
| <b>Format</b>      | Liquid in 10mM PBS, pH 7.4, 150mM sodium chloride, 0.05% BSA, 0.02% sodium azide and 50% glycerol. |
| <b>Storage</b>     | Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze/thaw cycles.           |

## Protein Information

---

|                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|-----------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Name</b>     | OPA1                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| <b>Function</b> | Dynamin-related GTPase that is essential for normal mitochondrial morphology by mediating fusion of the mitochondrial inner membranes, regulating cristae morphology and maintaining respiratory chain function (PubMed: <a href="#">16778770</a> , PubMed: <a href="#">17709429</a> , PubMed: <a href="#">20185555</a> , PubMed: <a href="#">24616225</a> , PubMed: <a href="#">28628083</a> , PubMed: <a href="#">28746876</a> , PubMed: <a href="#">31922487</a> , PubMed: <a href="#">32228866</a> , PubMed: <a href="#">32567732</a> , PubMed: <a href="#">33130824</a> , PubMed: <a href="#">33237841</a> , PubMed: <a href="#">37612504</a> , PubMed: <a href="#">37612506</a> ). Exists in two forms: the transmembrane, long form (Dynamin-like GTPase OPA1, long form; L-OPA1), which is tethered to the inner mitochondrial membrane, and the short soluble form (Dynamin-like GTPase OPA1, short form; S-OPA1), which results from proteolytic cleavage and localizes in the intermembrane space (PubMed: <a href="#">31922487</a> , PubMed: <a href="#">32228866</a> , PubMed: <a href="#">33237841</a> , PubMed: <a href="#">37612504</a> , PubMed: <a href="#">37612506</a> ). Both forms (L-OPA1 and S-OPA1) cooperate to catalyze |

the fusion of the mitochondrial inner membrane (PubMed:[31922487](#), PubMed:[37612504](#), PubMed:[37612506](#)). The equilibrium between L-OPA1 and S-OPA1 is essential: excess levels of S-OPA1, produced by cleavage by OMA1 following loss of mitochondrial membrane potential, lead to an impaired equilibrium between L-OPA1 and S-OPA1, inhibiting mitochondrial fusion (PubMed:[20038677](#), PubMed:[31922487](#)). The balance between L-OPA1 and S-OPA1 also influences cristae shape and morphology (By similarity). Involved in remodeling cristae and the release of cytochrome c during apoptosis (By similarity). Proteolytic processing by PARL in response to intrinsic apoptotic signals may lead to disassembly of OPA1 oligomers and release of the caspase activator cytochrome C (CYCS) into the mitochondrial intermembrane space (By similarity). Acts as a regulator of T-helper Th17 cells, which are characterized by cells with fused mitochondria with tight cristae, by mediating mitochondrial membrane remodeling: OPA1 is required for interleukin-17 (IL-17) production (By similarity). Its role in mitochondrial morphology is required for mitochondrial genome maintenance (PubMed:[18158317](#), PubMed:[20974897](#)).

**Cellular Location**

[Dynamin-like GTPase OPA1, long form]: Mitochondrion inner membrane; Single-pass membrane protein. Note=Detected at contact sites between endoplasmic reticulum and mitochondrion membranes.

**Tissue Location**

Highly expressed in retina (PubMed:11017079, PubMed:11017080, PubMed:11810270). Also expressed in brain, testis, heart and skeletal muscle (PubMed:11810270). Low levels of all isoforms expressed in a variety of tissues (PubMed:11810270) [Isoform 2]: Isoform 2 expressed in colon, liver, kidney, thyroid gland and leukocytes.
