

# Claudin 1 Rabbit mAb

Catalog # AP79001

#### **Product Information**

Application WB
Primary Accession 095832

Reactivity Rat, Human, Mouse

**Host** Rabbit

**Clonality** Monoclonal Antibody

**Isotype** IgG

**Conjugate** Unconjugated

**Immunogen** A synthesized peptide derived from human Claudin 1

**Purification** Affinity Chromatography

Calculated MW 22744

## **Additional Information**

**Gene ID** 9076

Other Names CLDN1

**Dilution** WB~~1/500-1/1000

Format Liquid in 10mM PBS, pH 7.4, 150mM sodium chloride, 0.05% BSA, 0.02%

sodium azide and 50% glycerol.

**Storage** Store at 4°C short term. Aliquot and store at -20°C long term. Avoid

freeze/thaw cycles.

### **Protein Information**

Name CLDN1

**Synonyms** CLD1, SEMP1

**Function** Claudins function as major constituents of the tight junction complexes that

regulate the permeability of epithelia. While some claudin family members play essential roles in the formation of impermeable barriers, others mediate the permeability to ions and small molecules. Often, several claudin family members are coexpressed and interact with each other, and this determines the overall permeability. CLDN1 is required to prevent the paracellular diffusion of small molecules through tight junctions in the epidermis and is required for the normal barrier function of the skin. Required for normal water homeostasis and to prevent excessive water loss through the skin, probably via an indirect effect on the expression levels of other proteins, since CLDN1 itself seems to be dispensable for water barrier formation in

keratinocyte tight junctions (PubMed: <u>23407391</u>).

**Cellular Location** Cell junction, tight junction. Cell membrane; Multi-pass membrane protein.

Basolateral cell membrane Note=Associates with CD81 and the CLDN1-CD81

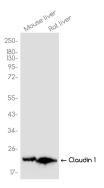

complex localizes to the basolateral cell membrane.

**Tissue Location** 

Strongly expressed in liver and kidney. Expressed in heart, brain, spleen, lung

and testis.
