

Gata3 (13R8) Rat Monoclonal Antibody

Gata3 (13R8) Rat Monoclonal Antibody Catalog # AP93638

Product Information

Application WB
Primary Accession P23772
Reactivity Mouse
Clonality Monoclonal
Calculated MW 47968

Additional Information

Gene ID 14462

Other Names Trans-acting T-cell-specific transcription factor GATA-3, GATA-binding factor 3,

Gata3, Gata-3

Dilution WB~~1:1000

Storage Conditions -20°C

Protein Information

Name Gata3

Synonyms Gata-3

Function Transcriptional activator which binds to the enhancer of the T-cell receptor

alpha and delta genes. Binds to the consensus sequence 5'-AGATAG-3'. Required for the T-helper 2 (Th2) differentiation process following immune

and inflammatory responses. Positively regulates ASB2 expression

(PubMed:<u>31175139</u>). Coordinates macrophage transcriptional activation and UCP2-dependent metabolic reprogramming in response to IL33. Upon tissue

injury, acts downstream of IL33 signaling to drive differentiation of inflammation-resolving alternatively activated macrophages.

Cellular Location Nucleus

Tissue Location T-cell specific.

Images

under reducing conditions and blotted onto nitrocellulose membrane. AP93638 at 1 μ g/mL was used as the primary antibody and peroxidase conjugated goat anti-rat IgG was used as the secondary antibody. Gata3 band was visualized using ECL Substrate. Result: AP93638 can detect mouse Gata3 by Western blotting.
