

Gata3 (3Z13) Rat Monoclonal Antibody

Gata3 (3Z13) Rat Monoclonal Antibody

Catalog # AP93640

Product Information

Application	WB, IHC
Primary Accession	P23772
Reactivity	Mouse
Clonality	Monoclonal
Calculated MW	47968

Additional Information

Gene ID	14462
Other Names	Trans-acting T-cell-specific transcription factor GATA-3, GATA-binding factor 3, Gata3, Gata-3
Dilution	WB~~1:1000 IHC~~1:100~500
Storage Conditions	-20°C

Protein Information

Name	Gata3
Synonyms	Gata-3
Function	Transcriptional activator which binds to the enhancer of the T-cell receptor alpha and delta genes. Binds to the consensus sequence 5'-AGATAG-3'. Required for the T-helper 2 (Th2) differentiation process following immune and inflammatory responses. Positively regulates ASB2 expression (PubMed: 31175139). Coordinates macrophage transcriptional activation and UCP2-dependent metabolic reprogramming in response to IL33. Upon tissue injury, acts downstream of IL33 signaling to drive differentiation of inflammation-resolving alternatively activated macrophages.
Cellular Location	Nucleus
Tissue Location	T-cell specific.

Images

Various protein samples were run on 6-18% SDS-PAGE

under reducing conditions and blotted onto nitrocellulose membrane. AP93640 at 1 $\mu\text{g}/\text{mL}$ was used as the primary antibody and peroxidase conjugated goat anti-rat IgG was used as the secondary antibody. Gata3 band was visualized using ECL Substrate. Lane 1: 15 μg of Jurkat lysate Lane 2: 15 μg of SH-SY5Y lysate Lane 3: 15 μg of MCF-7 lysate Result: AP93640 can detect mouse Gata3 by Western blotting.
