

Anti- FcRH5 / IRTA2 / CD307e Reference Antibody (DFRF4539A)

Recombinant Antibody
Catalog # APR10760

Product Information

Application	FC, Kinetics, Animal Model
Primary Accession	Q96RD9
Reactivity	Human
Clonality	Monoclonal
Isotype	IgG1
Calculated MW	106437

Additional Information

Target/Specificity	FcRH5 / IRTA2 / CD307e
Endotoxin Conjugation	Unconjugated
Expression system	CHO Cell
Format	Purified monoclonal antibody supplied in PBS, pH6.0, without preservative. This antibody is purified through a protein A column.

Protein Information

Name	FCRL5
Synonyms	FCRH5, IRTA2
Function	Plays an important role in B-cell response to antigen that acts both as a negative or positive coreceptor. Inhibits B-cell receptor (BCR) signaling in the absence of CR2 stimulation but engagement with CR2 and the BCR lead to a superior calcium response compared to CR2 and BCR costimulation (PubMed: 30107486). May be involved in B-cell development and differentiation in peripheral lymphoid organs and may be useful markers of B-cell stages. May have an immunoregulatory role in marginal zone B-cells. May play a role in fertilization (By similarity).
Cellular Location	Cell membrane; Single-pass type I membrane protein
Tissue Location	Expressed in marginal zone B-cells, immunoblasts, tonsillar germinal center centrocytes and in the intraepithelial and interfollicular regions of the tonsil. Expressed in many lymphoma cell lines and on hairy cell leukemia cells. Isoform 1, isoform 3, isoform 4 and isoform 5 are detected in lymph node,

spleen, bone marrow, and small intestine with preponderance of isoform 3. Expressed in mature and memory B-cells and down-regulated in germinal center cells (at protein level).

Images

Anti- FcRH5 / IRTA2 / CD307e Reference Antibody (DFRF4539A) on SDS-PAGE under reducing (R) condition. The gel was stained with Coomassie Blue. The purity of the protein is greater than 95%

The purity of Anti- FcRH5 / IRTA2 / CD307e Reference Antibody (DFRF4539A) is more than 95% ,determined by SEC-HPLC.
