Application Note Suitable for immunomicroscopy and flow cytometry or FACS analysis as well

> as other antibody based fluorescent assays requiring extremely low background levels, absence of F(c) mediated binding, lot-to-lot consistency,

high titer and specificity.

This product was prepared from monospecific antiserum by immunoaffinity **Purity**

chromatography using Guinea Pig IgG coupled to agarose beads followed by

solid phase adsorption(s) to remove any unwanted reactivities, pepsin

digestion and chromatographic separation. Assay by

immunoelectrophoresis resulted in a single precipitin arc against

anti-Fluorescein, anti-Goat Serum, Guinea Pig IgG and Guinea Pig Serum. No

reaction was observed against anti-Pepsin or anti-Goat IgG F(c).
