Application Note Antibody Anti-Mouse F(ab')2 IgG (H&L) is suitable for immunoblotting

(western or dot blot), ELISA, and immunohistochemistry assays requiring

lot-to-lot consistency.

**Purity** This product was prepared from monospecific antiserum by immunoaffinity

chromatography using Mouse IgG coupled to agarose beads followed by solid phase adsorption(s) to remove any unwanted reactivities, pepsin digestion and chromatographic separation. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Alkaline Phosphatase,

anti-Rabbit Serum, Mouse IgG and Mouse Serum. No reaction was observed

against anti-Pepsin, anti-Rabbit IgG F(c) or Human Serum Proteins.

**Storage Condition** Store vial at 4° C before opening. DO NOT FREEZE. This product is stable at

4° C as an undiluted liquid. Dilute only prior to immediate use. Freezing alkaline phosphatase conjugates will result in a substantial loss of enzymatic

activity.

**Precautions Note**This product is for research use only and is not intended for therapeutic or

diagnostic applications.

## **Background**

Anti-Mouse F(ab')2 IgG (H&L) antibody generated in rabbit detects specifically mouse F(ab')2 IgG (H&L). This secondary antibody anti-Mouse is ideal for investigators who routinely perform titration assays, western-blot, immunoprecipitation and more generally immunoassays.
